

Network Information

(To be completed if Control System is to reside on Building Network or EIM - Ethernet Interface Module is installed)

Site Default IP Address (xxx.xxx.xxx.xxx)	Subnet Mask	
	Default Gateway	
	DNS IP	
Networked or Stand-Alone System?	Networked	
	Stand-Alone System	

If there are additional Network Devices, please provide a range of IP Addresses

IP Address Range		through	
------------------	--	---------	--

Ethernet Interface Module?

(The standard IP Port assigned to EIM Devices is 10001, if there is a conflict please provide an alternate port _____)

Computer for EIM

The PC/laptop will be accessible on-site and operational. Computer operator must have ADMINISTRATOR privileges so that the Keeper Enterprise software can be installed.

The PC/laptop must have some type of connection to the lighting control system either directly through a COM port to the nearest panel or through TCP/IP connection to the Ethernet Interface Module.

If Ethernet Interface Module has been provided, a qualified Network Administrator has properly configured the EIM or has provided the required networking information for the B&C Technician.
